

Hello Parents,

We apologize for not getting this information out sooner. Here are the directions for creating an observer account in Canvas.

Please be sure to get the pairing code and create the observer accounts using stem.instructure.com. This needs to be done via a web browser and not in the app. You can add the app after creating the account.

Pairing Codes:

From student: <https://community.canvaslms.com/docs/DOC-15036-4212938128>

Parent App:

Parent iOS app account creation: <https://community.canvaslms.com/docs/DOC-15084-59346940211>

Parent Android app account creation:

<https://community.canvaslms.com/docs/DOC-15181-59347942780>

You have to use the pairing code in a browser. It will not work on the app. Once the pairing has been completed, you can then use the app for observing your student.

If you continue to have issues, please send us a support ticket to support@stemk12.org.

Thank you for your patience.

Mike Pritchard
