

MEDICATION POLICY (Elementary)

1. The use of medication at school is discouraged in most instances. Most medications are available in long acting form and parents are encouraged to administer such medication at home.
2. Medication to be given at school (prescription medication and over-the-counter) must have a completed Student Medication Request and Release Agreement and Provider Authorization form on file.
3. All prescription medication must be furnished in the original pharmacy labeled container, with the student's name, medication, dosage, and physician on the label. Over-the-counter medications must be in an original container (these requirements are state regulations). Medication in baggies will not be accepted.
