Position Description:

As a teacher, you will be expected to plan, organize, and implement an appropriate instructional program in a learning environment that guides and encourages students to develop and fulfill their academic potential. You are challenged with new teaching methods and educational tools in an ever changing and strategic environment.

Position Requirements:

- Plan and implement problem-based lessons based on state standards.
- Create engaging lessons that integrate technology, science and engineering that also develops student critical thinking and problem solving skills.
- Ensure the success of all students by continually assessing student progress toward mastery of standards and keep students and parents well informed of student progress.
- Provide accommodations and modifications for growth and success of all students.

- Collaborate with colleagues with the intent of deepening pedagogical content knowledge, improving teaching practices, and creating problem-based learning opportunities.

Qualifications Required:

- Bachelor's degree or higher from an accredited institution with a valid state teaching license and highly qualified content knowledge
- 1 year experience preferred
- Experience with Learning Management Systems and Google preferred
