

MEDICATION POLICY (Elementary)

- 1. The use of medication at school is discouraged in most instances. Most medications are available in long acting form and parents are encouraged to administer such medication at home.
- 2. Medication to be given at school (prescription medication and over-the-counter) must have a completed Student Medication Request and Release Agreement and Provider Authorization form on file.
- 3. All prescription medication must be furnished in the original pharmacy labeled container, with the student's name, medication, dosage, and physician on the label. Over-the-counter medications must be in an original container (these requirements are state regulations). Medication in baggies will not be accepted.
